

PERGO®

HYBRID PLANKS & TILES

EMBR REALN

Catch the moment. Seize the day. But first and foremost: be fully present to enjoy every minute of it. At Pergo we recognize the importance of focus. To get rid of distractions. To get closer to the stuff that matters.

As the inventor of laminate flooring, we have provided a stage for everyday life for generations. Pergo's new hybrid floors continue along the same lines. Durable, worry-free flooring might seem like a small part of life – and it probably is – but nevertheless it's our contribution.

We trust you to make the most of the rest.

FACE NESS

GLOMMA PRO, WHITE SCOTTISH OAK . V3631-40177

Scandinavian simplicity

Pergo floors have always been about durability. Floors that will take you through a lifetime of everyday and not-so-everydays. A tradition that is very much alive in our new hybrid floors.

Rooted in the Scandinavian design tradition, we are proud to introduce a range of hybrid vinyl floors that are just as easy on the eye as they are to live on. Stylish, smooth or subtle – it's all there for you to pick a favourite. And do take your time. After all, it may be the last time you think about flooring for a very, very long time.

Life made simple. That's how we like it too.

VISKAN PRO, DARK GREY LIMESTONE ,V3520-40174

There's hybrid – and there's Pergo Hybrid

Are you looking for a floor that has a natural look and is easy to maintain? Well, you have found it. Pergo Hybrid vinyl floors push the limits of the category by not only creating detailed, authentic designs. We also invent new technologies that are able to produce floors with a high level of detail that mimics the original perfectly. Get ready for hybrid floors like you've never seen them before!

To increase the feeling of real natural diversity, we add different planks with varying patterns.

The result is a hybrid floor that really looks the part. But there is more to Pergo Hybrid floors than just looks.

Our hybrid floors are 100% free of ortho-phthalates, which makes for a healthier home atmosphere.

The click installation system is easy to master, even in tight spots. And if you are renovating, hybrid vinyl presents even more benefits.

GLOMMA PRO, NATURAL IRISH OAK, V3531-40183

A floor made to keep up with you

Pergo Hybrid is a perfect match for an active lifestyle thanks to a superior top layer. This protects your floor against staining, soiling and scratching. A Pergo Hybrid floor is also waterproof down to its core which in turn brings another bonus: it makes the floor easy to keep clean.

Pergo Hybrid flooring can take a knock or two thanks to the **extra-strong core and extra-resistant top layer**.

Can't wait to click? With Pergo Hybrid **in most cases preparation only requires the supplied underlay** – even if you install on a tile floor or an uneven subfloor.

Don't worry about spills or water. Hybrid floors are **100% waterproof**.

All Pergo Hybrid floors are of our **superior quality level**, which means extra durability and a **25-year warranty**.

A sustainable, healthy choice for your indoor climate

At Pergo we believe that creating great floors for great interiors is a challenge that goes beyond design. It involves looking out for your health and the health of our planet in choosing materials, how we produce our floors and how we minimize the footprint on the planet.

MINIMISE OUR IMPACT ON THE PLANET

We have always been committed to making our products in a responsible and sustainable way that uses a minimum of resources. For example, our production facilities are committed to efficient energy use and get a large part of their heating from renewable energy sources. And we have an internal closed loop production which enables us to recycle our own industrial waste (99 %). In this way, our production facility produces no waste that needs to be incinerated or landfilled afterwards.

HEALTHY INDOOR AIR QUALITY

Thinking about the environment includes how we affect the inside of your home and those who live there. That is why we make sure the VOC emissions of our floors is much lower than the European norm. In addition, we never use any harmful plasticisers. Instead we only use ortho-phthalate free plasticisers to give your floor its flexibility. These are the same plasticisers that can be used for kids' toys or for food storage purposes. As a result, our hybrid floors are 100% orthophthalate-free.

COMPLETE TRANSPARENCY ON MATERIALS

We manufacture our hybrid vinyl floors in the heart of Europe, with raw materials coming mainly from neighbouring countries.

A hybrid floor can contain up to 40% chalk, a material that is and will remain available in abundance. A quarter of our hybrid is made from recycled PVC from our own production facilities. Only one quarter is made from what is known as 'virgin' or new PVC. The remaining ingredients – primarily additives – do not contain any harmful substances.

Even the way we construct our floors plays a part. For example, having a closed surface layer makes it possible to keep your floor clean in a harmless way. Instead of using aggressive cleaning agents and soaps you can use mild soap or just lukewarm water to rinse off your floor.

* Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).

Glomma pro

1494 × 209 × 5 mm
4-way bevel | Uniclic®

Glomma pro is the choice that lets your house breathe. The planks are generously sized and make rooms look larger. Its textures and variations evoke nature, for a clean touch of authenticity.

5 perfect finishes in 1 profile

Finish off your Pergo floor perfectly. Our colour-matched profile gives you no less than 5 different options in one. And it's easy to use: just cut the profile into your desired shape with the included knife.

Full profile to be cut

See colour matching matrix on page 36 for correct article number.

PGVINCP(-), 2000 × 45 × 8 mm

End profile

To cover the expansion joint between floor and e.g. wall, window or threshold.

PGVINCP(-), 2000 × 19 × 8 mm

Expansion profile

To cover the expansion joint between two floors of the same height.

PGVINCP(-), 2000 × 38 × 8 mm

Adapter profile

To cover the expansion joint between a higher and a lower floor.

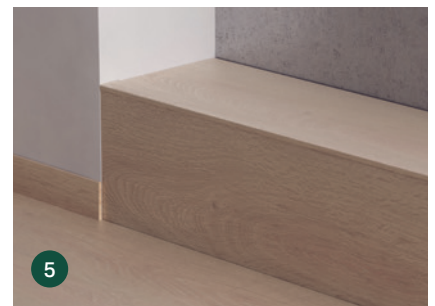

PGVINCP(-), 2000 × 45 × 8 mm

Transition profile

To cover the expansion joint between floor and e.g. carpet.

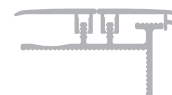

PGVINCP(-), 2000 × 38 × 8 mm

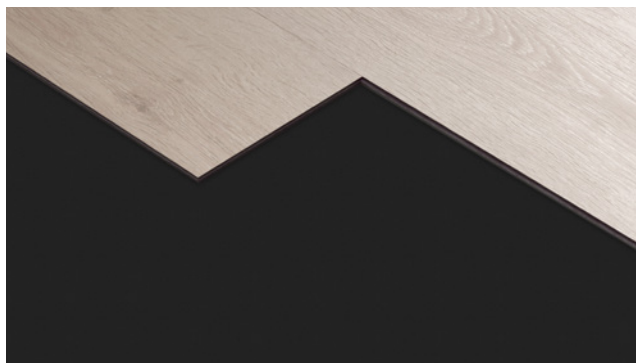

Stair nose

The Incizo® subprofile is required for stair application and has to be ordered separately.

PGVINCP(-), NEVINCPBASE1, 2000 × 38 × 8 mm

UNDERLAYS

Hybrid Performance Underlay

Pergo Hybrid Performance Underlay has a noise-reducing and levelling function. The smooth top surface makes installing the hybrid panels easier and allows for floor shrinkage and expansion afterwards.

20/50m2 roll Thickness $\pm 1.2\text{mm}$

INSTALLATION

Installation Kit

Everything you need in one box. Contains tapping block, installation spacers in two sizes (2 x 18 = 36 pcs) and a pull bar.

PGTOOL

Want a watertight finish?

Optimize your Hybrid floor with a watertight finish. All products can be used for our colour matched and paintable waterproof skirtings.

1

FOAMSTRIP

NEVRFOAMSTRIP15, 15000 × 8 × 5 mm

Fill up expansion joints with the Foamstrip with adhesive backing.

2

AQUA SEALANT

PGKITTRANSP

For invisible and waterproof finishing.

Please note: Skirting board not available.

MAINTENANCE

All-round Floor Cleaner

Specially developed for cleaning laminate, wood and hybrid flooring. Ideal for removing dirt, grease spots and heel marks, as well as for daily cleaning.

PGCLEANALL1000

Repair Wax

Repair the colour of damaged planks quickly and easily with wax in colours that match the Pergo wood palette. Contains 1 melting knife, 1 comb, 7 wax blocks. For more information on how to mix colours, please visit pergo.com.

PGREPAIR

PERGO HYBRID

- 1 Superior Protective top layer for scratch, stain and wear resistance – extra matt for authentic look.
- 2 Fine printed hybrid decor layer.
- 3 Flexible hybrid layer for a sound absorbing, soft, warm and comfortable feeling.
- 4 Rigid composite core that makes levelling of some subfloors unnecessary. Two glassfibre reinforced rigid layers prevent the floor from cupping.
- 5 Pergo Hybrid Performance Underlay has a noise-reducing and levelling function..

EASY INSTALLATION The Uniclic® system makes installation quick and easy. Just click the planks into place using one of the two methods, and you'll be done in no time.

FIRE RESISTANCE Pergo Hybrid floors have a natural high resistance to fire. They are designed to meet all European requirements for installation in escape routes and assembly halls.

WEAR PROTECTION The surface of Pergo Hybrid offers a multi-layer protective floor finish. The protective top layer provides scratch, stain and wear resistance and easy maintenance.

WATER RESISTANCE Our Moisture Resistance System combines the waterproof floor with a strong and tight click joint. This gives Pergo Hybrid floors some of the best waterproof properties on the market.

IMPACT RESISTANCE Pergo's hybrid surface is multi-layer build-up. In combination with the dense core material it gives the floor a very high impact resistance and a low residual indentation, protecting your floor from potential damage.

HYGIENIC A Pergo Hybrid floor improves hygiene and makes it easier to maintain a clean home. The sealed surface prevents bacteria, and helps reduce the amount of cleaning chemicals you need.

CASTOR CHAIR The multi-layer build-up of Pergo hybrid in combination with the properties of the core are designed to withstand damage from castor chairs.

EASY MAINTENANCE The Pergo protective top layer is resistant to dirt and offers you low maintenance and effortless cleaning. The solid design of the click joints also keeps dirt from penetrating the joint.

SOUND REDUCTION The soft hybrid floor reduces step noise and provides a quiet and comfortable walking experience.
