MUSE

Stone tile collection marked by refinement

Pushing the limits to create enduring beauty

THE MAGIC BEHIND MUSE

The blueprint: Belgian bluestone

Creating stunning floors all starts with the search for 'the perfect original'. For Muse, it was found in a Belgian bluestone quarry. Belgian bluestone originated over 400 million years ago, in what is now the Belgian Ardennes but was once a shallow tropical sea. Tiny pieces of chalk were deposited by the tides, building up over time to form massive layers of stone. That's also why Belgian bluestone contains a lot of shells and fossils, creating the unique pallet that forms the inspiration for this Muse floor.

MUSE

Looks like stone, feels like home

Worried about the impact of water, spills and scratches on your floor? Don't be! Quick-Step laminate can handle anything life throws at it – so you can relax and enjoy the beauty of your home.

Instant installation

Laminate tiles are so quick and easy to install, you can even do it yourself! Thanks to the waterproof surface and joins, it's safe to install throughout your home!
